CUT ALONG THE DASHED OUTLINE

01 Print at 100%

Print on A4. Select Actual size or 100%. Disable Fit to page.

85.6 mm

The long edge of a bank card should fit between the end marks. If it doesn't, check your print settings.

02 Cut and measure

Cut along the dashed outline. Make a small fold at the solid line, cut the slit, then unfold the paper. Wrap the strip around your finger, printed side out. Feed the narrow end through the slit from behind. Pull until the loop fits snugly, then read the mark at the slit.

03 Match your size

Find the closest circumference and check the corresponding size on your ring's product page.

Fit tip

Measure at the end of the day and check that the loop slides over your knuckle. If you're between sizes, choose the larger one.
